## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of polypeptides encoded by ORF6 in the reply filed on 12/13/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Applicant states that the polypeptides encoded by the polynucleotides recited in claim 51, section e, claim 52, section a, claim 53, section e, and claim 54, section a read on the elected sequence. Claim 57 also reads on the elected sequence. Applicant is reminded that examination will be **restricted** to only the elected sequences. An examination of the claims with respect to the elected sequences only appears below.

### *Claim Rejections - 35 USC § 101*

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
4. Claims 51-54 and 57 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by a substantial asserted utility or a well-established utility. The specification suggests but does not demonstrate that the claimed polypeptides have GDP-D-mannose dehydratase activity based on a 51% homology with a GDP-D-mannose dehydratase from another organism. Neither the specification or the art describe the significance of this activity or a real world use for a protein with this activity.

### *Claim Rejections - 35 USC § 112*

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 1654

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 51-54 and 57 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention. Specifically, since the claimed invention is not supported by a substantial utility for the reason set forth above, one skilled in the art would not know how to use the claimed invention so that it would operate as intended without undue experimentation.

### *Conclusion*
